SUMMARY

Full stack engineer with 4+ years of experience designing and building reliable web applications and backend systems. Skilled across the stack with hands-on experience in Go, JavaScript/TypeScript, and PHP/Laravel, and a strong track record of leading system migrations, improving performance, and delivering client-facing features from the ground up. Known for writing clean, maintainable code and collaborating closely with cross-functional teams to ship production-ready solutions.

EXPERIENCE

Full Stack Engineer | Lima Bean *May 2024 – Present*

- Led the migration of a legacy backend system to Go, improving overall performance and enabling the platform to handle multiple processes at once more efficiently.
- Owned the Template Builder module end-to-end for the Sportsman's Warehouse e-commerce redesign, from design through implementation and delivery.
- Designed and implemented checkout and shipping logic, including Click & Collect fee handling, for a high-traffic e-commerce platform.
- Improved the codebase's long-term maintainability and testability by restructuring how data and business logic were organized.
- Standardized application configuration to work consistently across local, testing, and production environments.

Analyst Programmer | AutoWealth *Jan 2022 – Feb 2024*

- Led a revamp of the company's main website, improving data loading performance by up to 50%.
- Built a reusable template system that significantly sped up the client onboarding process.
- Developed and maintained both the front-end and back-end of AutoWealth's websites, ensuring a responsive, reliable user experience.
- Conducted code reviews and mentored teammates, raising overall code quality and consistency across the team.
- Partnered with cross-functional teams to design and deliver new product features.

Back End Engineer | Northbit.id (Freelance) *Jan 2023 – Feb 2024*

- Designed backend architecture and system structure for a range of client projects.
- Built and maintained backend services following clean coding practices for long-term reliability.
- Designed database schemas and modeled relationships to support scalable data structures.
- Conducted code reviews to keep the codebase clear and maintainable for the wider team.

Back End Web Developer | Genesys Integrated Indonesia *Oct 2020 – Nov 2021*

- Developed and maintained scalable web applications, primarily point-of-sale (POS) systems.
- Built multi-level-marketing applications supporting multiple users, transactions, and integrated payments.
- Wrote efficient database queries to retrieve and present complex data on the front end.
- Tested services thoroughly before release and resolved performance issues to keep applications running smoothly.

Web Developer | Lembah Indah Hotel & Resort (Freelance) *Aug 2020 – Nov 2020*

- Built the company's website and lodging system from the ground up, covering analysis, design, development, testing, and deployment.

- Responded quickly to client issues, ensuring a smooth and reliable experience.

Software Engineer (Internship) | Brawijaya University Hospital *Jul 2018 – Sept 2018*

- Contributed to the full lifecycle of the company website, from analysis and design through deployment and support.
- Built scalable solutions that improved user experience and supported business growth.

EDUCATION

Brawijaya University *Aug 2015 – Feb 2020*

B.Sc. in Computer Science — GPA: 3.29 / 4.00

ORGANIZATIONS

Kominfo Division, Eksekutif Mahasiswa Informatika *2017 – 2018*

Handled external relations and information dissemination for the organization.

SKILLS

Languages & Frameworks: Go, Gofiber, JavaScript, TypeScript, Node.js, NestJS, Express.js, PHP, Laravel

Architecture & Design: Clean Architecture, Domain-Driven Design (DDD), Microservices, RESTful API design

Data & Infrastructure: PostgreSQL, MySQL, MongoDB, Redis, Docker, AWS, Apache Kafka, RabbitMQ

Tooling & Practices: Git, Jira, Postman, Unit & Integration Testing
